Geistlich Bio-Oss Collagen® ensures your success by creating a shield that maintains bone volume just where you need it:

- Buccal defects
- Minor vertical augmentations
- Filling the gap around an implant

A little innovation in the right place can make a big difference.

EXACTLY
Immediate Implant Placement with Geistlich Bio-Oss Collagen® 50mg

"Geistlich Bio-Oss Collagen® 50mg was the ideal size graft material for placement between the implant and facial plate for maintaining the hard and soft-tissue volume throughout the course of osseointegration and healing.”

Dr. Justin Kang | New Jersey, USA

Objective: Implant placement and bone grafting at time of extraction for replacement of a fractured maxillary bicuspid.

Conclusion: Geistlich Bio-Oss Collagen® and Geistlich Mucograft® are indispensable biomaterials for predictable flapless immediate implant placement.

1 Pre-operative assessment. Tooth #12 to be extracted and an immediate implant placed.

2 Geistlich Bio-Oss Collagen® 50mg hydrated with saline.

3 Geistlich Bio-Oss Collagen® 50mg in place, filling the bony gap around the implant.

4 Geistlich Mucograft® Seal is placed on the healing abutment for placement into the site.

5 Geistlich Mucograft® Seal is sutured in place.

6 Clinical situation 4 months post-operatively. Bone volume has been maintained and an increased width of keratinized tissue was obtained.
